EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Clint Mehall on December 15, 2010.

The application has been amended as follows:

a-Claims 7, 8 and 9 have been canceled.

b-In claims 2-6, 10, 11 and 21-24, the term "The transfer apparatus" has been changed to --The trimming apparatus--.

c-Claim 1 is amended as follows:

--Claim 1: A trimming apparatus for a sheet material article comprising:

a front trimming station;

a side trimming station located downstream of the front trimming station; and

a transfer apparatus for conveying the sheet material from the front trimming station to the side trimming station, the transfer apparatus comprising:

a transfer element configured to grip the sheet material article and move the sheet material article in a transfer direction onto a moving side table of the

Art Unit: 3724

sheet material article trimmer, the moving side table carrying the sheet material article as the sheet material article is gripped by the transfer element; and

a driver configured to move the transfer element at a same speed as the moving side table during a first time period, the speed of the side table and the transfer element varying during the first time period, when the sheet material article is gripped by the transfer element and the side table is moving in the transfer direction;

wherein the transfer element includes an upper belt and a lower belt. --

d-Claim 25 is amended as follows:

--Claim 25: A trimming apparatus for a sheet material article comprising:

a front trimming station;

a side trimming station located downstream of the front trimming station; and

a transfer apparatus for conveying the sheet material from the front trimming station to the side trimming station, the transfer apparatus comprising:

a transfer element configured to grip the sheet material article and move the sheet material article in a transfer direction onto a side table of the sheet material article trimmer, the side table carrying the sheet material article as the sheet material article is gripped by the transfer element; and

Art Unit: 3724

a driver configured to move the transfer element at a same speed as the side table during a first time period, the speed of the side table and the transfer element varying during the first time period when the sheet material article is gripped by the transfer element and the side table is moving in the transfer direction;

the driver including an epicycle gear unit, the epicycle gear unit including a constant speed input member driven by a main trimmer drive of the sheet material article trimmer and a variable speed input member configured for varying an output of the epicycle gear unit so as to vary a speed of the transfer element;

wherein the transfer element includes an upper belt and a lower belt. --

2. The following is an examiner's statement of reasons for allowance: claims 1 and 25 are allowable for setting forth a trimming apparatus comprising a front trimming station, a side trimming station and a transfer apparatus for transfer a sheet material article from the front trimming station to the side trimming station, the transfer apparatus include an upper belt and a lower belt for gripping the sheet material article onto a moving side table, wherein the upper belt, the lower belt, and the side table have the same speed during a first time period, and wherein the upper belt, the lower belt, and the side table vary speed during the first time period.

For example, Sarring (3,722,336) teaches a trimming apparatus comprising a front trimming station, a side trimming station and a transfer apparatus for transfer a sheet material article from the front trimming station to the side trimming station. The transfer apparatus

Art Unit: 3724

includes an upper belt and a lower belt. Sarring does not teach the transfer apparatus including a moving side table.

Kile et al. (3,122,041) teach a trimming apparatus comprising a front trimming station, a side trimming station and a transfer apparatus for transfer a sheet material article from the front trimming station to the side trimming station. The transfer apparatus includes a side table. Kile does not teach the transfer apparatus including an upper belt and a lower belt. There is no teaching of combining the upper and lower belts in Sarring with the moving side table in Kile et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
